2. Project Details

2.1 Title

Building Demolition and Debris Removal With Heavy Equipment (\$25 million USD)

2.2 Description

The main objective of the of this project is to accelerate resettlement of internally displaced persons (IDPs) currently located in squatter settlements into their neighborhoods of origin or with host families or in new, economically viable settlements.

During the transition phase of this effort, transitional shelters are to be constructed to replace homes that were destroyed by the January 2010 earthquake. The main obstacles to constructing these shelters include the debris from destroyed homes and the presence of unsafe red homes.

In order to expedite construction of shelters/houses and facilitate the relocation of IDPs, this project will incorporate the use of heavy equipment and other means to augment other efforts in building demolition and debris removal.

2.3 Project URL

<http://>

2.4 Schedule

Start Date	End Date	Duration
01-Jan-2011		

3. Pillars and geographic locations

3.1 Primary Pillars

Pillar	Sub-sector	%
Social Rebuilding	Housing	100.00
Unallocated		0.00

3.2 Linkages (Secondary Pillars)

Pillar	Sub-sector
--------	------------

3.3 Geographic Locations

Department	Arrondissement	Commune	%
Ouest (Port-au-Prince)	Port-au-Prince Arrondissement	Port-au-Prince	100.00
Unallocated			0.00

4. Project Components and Outputs

4.1 Project Components

No. Component
1 Removal of rubble

4.2 Project Outputs

Key Output	Location	Year 1	Year 2	Year 3	Year 4	Year 5	Target
Physical progress (%)	Ouest (Port-au-Prince) Port-au-Prince Arrondissement Port-au-Prince						

4.3 Results and Success Indicators

Success Indicator	Year 1	Year 2	Year 3	Year 4	Year 5
Buildings are demolished and rubble is removed	25,000,000				

4.4 Data methods to verify success indicators

Verification by USAID and Ministry of Public Works

5. Financial Information

5.1 Please advise whether this is an on-budget or off-budget project

Is this project included in the Government of Haiti's budget? - Yes

Is this project funded by Government of Haiti? - No

5.2 Will this project be seeking funding from the Haiti Reconstruction Fund? (more information on the HRF can be found on the IHRC website)

Yes UNDP

5.3 Project Cost

Note that the years are automatically generated based on the start and end dates specified in section 2.4.

Implementation Years	Currency	Rate to 1 USD	Cost	Cost(USD)
Total	USD	1.0000	25,000,000	25,000,000
Unplanned			25,000,000	25,000,000

5.4 Commitments and Disbursements

Funding Source Funding Agency	1st Level Implementer	Type	Commitment (USD)	Disbursement (USD)
<input type="checkbox"/> Pledge (New York Conference) United States of America	United States of America			25,000,000
TOTAL			25,000,000	

6. Impact Assessment

6.1 Contribution to Haiti's social and economic development

a) Number of local workers that will be employed in this project and progress made to date:

	Number of local workers	Percentage of local workers
Planned		

b) How will the project use Haitian sourced goods and services and progress made to date? How will the project create additional capacity for the Haitian economy and progress made to date?

To be determined. Where possible, the project will be supplemented with manual labor from target neighborhoods for rubble removal. It is anticipated that Haitian firms will furnish a substantial portion of the required equipment and labor.

6.2 Contribution to equality

a) Does this project target vulnerable groups (e.g. people living in poverty, people with disabilities etc.)

<input checked="" type="checkbox"/> Yes	No	Describe the target group	People living in poverty, people living in temporary shelters or without shelter.
		Describe how the target group participated or will participate in the project consultations	The project will inform the IHRC of its consultation plans before implementing this project.
		Describe how the target group will benefit from the project results	The neighborhoods of the target population will be improved by the clearing of debris.

b) Does this project take measures to promote gender equity?

- Yes No Describe how gender equity was considered or will be considered in the project consultations
- Women and children constitute the majority of targeted beneficiaries. Because of the prevalence of women-headed households in the target community, and preference programs to assist them through this project, gender equity is a main consideration of the project.
- Describe how the project will ensure gender equity in the results and progress made to date

c) Has a gender analysis been conducted?

- Yes No Describe how the project design was changed to take into account the results of the analysis

d) Does this project take into account specific needs of children and young people?

- Yes No Describe the group of children and young people that will benefit from the project results
- Women and children constitute the majority of targeted beneficiaries due to the prevalence of women-headed households in the target community, and preference programs to assist them through this project.
- Describe how children and young people or their carers participated or will participate in the project consultations
- The project will inform the IHRC of its consultation plans before implementing this project.
- Describe how children and young people will benefit from the project results
- The neighborhoods of the children in the community will be improved by the clearing of debris.

6.3 Sustainability Assessment

Participating firms and individuals will be mandated to use improved construction methods and standards that will mitigate disasters and be safe and more environmentally sustainable.

6.4 Environmental Assessment

Please describe the measures taken to ensure that the project has a positive impact on the environment. If relevant, please specify how the project might negatively impact the environment, how you plan to measure and mitigate this impact and progress made to date.

An environmental assessment has been performed for rubble removal.

7. Line Ministry and Government of Haiti Involvement

7.1 Required Approvals

This project is in line with the plans of the Ministry of Public Works.

7.2 Line Ministry Involvement

Which Ministries or other offices of the Government of Haiti are you in touch with? Ministry of Public Works

Please provide the names of your contacts within the Ministries or other offices of the Government of Haiti Minister Jacques Gabriel and Mme. George Salomon

8. Local Community Support

8.1 Local Community Support

The project will inform the IHRC of its consultation plans before implementation of this project.

9. Monitoring Process

9.1 Anti-corruption mechanism

HRF regulations on procurement will apply.

9.2 Project monitoring process

Independent supervision of construction projects will be procured for the monitoring and evaluation of this project. Additionally, IHRC monitoring and evaluation systems will provide oversight.

10. Obstacles/Constraints

10.1 Obstacles

Bottleneck	Description	Organization/person that could address the bottleneck	Specific requests to IHRC in addressing the bottleneck
1. Government approval or licensing is required		Rubble processing arrangements will require policy decisions by the Government of Haiti.	Government of Haiti should make decisions regarding the arrangements for processing the rubble.
3. Consultation scheduled is delayed or extended		Resolution of land claims issues require consultation. The Government of Haiti, municipalities, and communities can help address this bottleneck.	Continue to work with the Government of Haiti to speed up the formulation and implementation of policies that will address land claims issues.

11. Notes and Attachments

11.1 Notes / Comments

The start date of this project is an approximation - sometime between January and March of 2011. The preparatory phase of the project is from September to December 2010.

The geographic region for this project includes the following Port-au-Prince neighborhoods: Nazon, Christ Roi, Ravine

11.2 Uploaded Documents

11.3 Uploaded Photos

Pintade, Haute Turgeau, and others to be determined. The project will inform the IHRC of the approximate distribution of funds by geography as soon as possible.
